

The glass of the professional.

## Schott Zwiesel      The Glass of the Professional

- Independently recognised as the global market leader for the supply of fine crystal glass into the World's top hotels and restaurants.
- Consistent market leading quality, durability and service since 1962.
- Developed with sommeliers, mixologists, bar professionals and F&B Managers. We listen and innovate.
- Stemware of choice for the International Wine Challenge, Concours Mondial "World's Best Sommelier", SFC Wine Competition, International Sparkling Wine Symposium, Pro Vino, German Wine & Sommelier School, Austrian Sommeliers Association, Chaine des Rotisseurs
- Schott Zwiesel barware is used and recommended by the German Bar Keepers Union. It has been used to promote specialist beers by the British Beer & Pub Association.

### What makes Schott Zwiesel Unique?

#### Specific Features

#### Product Benefits

Tritan® crystal

Enhanced durability; market leading dishwasher resistance. Easier to handle; easier to clean - reducing replacement costs.

Tritan Protect®

Doubles the surface strength of the stem. Superior scratch resistance reduces breakage. Ranges with Tritan Protect®: Estelle, Concerto, Cru Classic. Diva, Diva Living, Fine, Pure, Vinalo, Vina

Tempered rims and stems

Increased resistance to breakage when racking. Ease of handling

Laser cut and polished rims

Rim strength can be varied according to application. Finer rims improve wine tasting and hygiene; while minimised rolled lips enhance chip resistance.

Diamond like brilliance

Enhanced table settings. Visual impact.

Superior Clarity	Improved display of wine, cocktails and beers. Tritan® crystal is so clear it is used to make the lenses for bi-xenon head lights.
Laser etched effervescent points	Prolongs the sparkle in wine and mineral water. Preserves the head on beer. Improves presentation.
Spun Stems	Our three Gourmet ranges are produced using a new spun technology. As a result there is no join or seams
Seamless Production for Pressed Stems	Enhanced elegance and feel. No detectable join. No seams.
Drop Protect	More efficient decanters and carafes which are less likely to drip or suffer runs down the outside.
Laser etched logo on foot plate	Confirmation of quality; encoded so we can identify when a glass was made and on which production line.
Stable feet	Our glasses have bases designed to reduce the danger of accidental knock overs.
<b>General Features</b>	
Eco-profile	Protecting our environment at the point of manufacture and disposal. ISO 9001:2008, ISO 14001:2004, ISO 14040:2009, ISO 14044:2006
Non-Toxic	Lead free. Our titanium is inert to the environment and lends our crystal greater durability.
Oxy-fuel Burning	Energy consumption reduced by 30%: EU 2015 NOX and CO <sub>2</sub> emission limits already exceeded.
Heat recycling	Reduced energy consumption.
UV badging	Reduced energy consumption. Ink bonded to the glass within 3 seconds of entering the UV light tunnel. Also enables use of any pantone colour and high detail.
