**Trolley Offerings
2023**

Hospitality Service Trolleys

Craster's classic hospitality service trolleys provide a flexible mobile presentation and distribution point. Available in natural oak and black lacquer, the trolleys feature easy-glide castors for maneuvering and a discreet rubber bumper to protect your skirting boards.

Service Tray Trolley

A robust solution for caterers that is designed with a secure metal leg structure, this trolley is available with or without the folding sides that doubles the presentation surface.

Modern Tray Trolley

This deceptively simple and agile trolley features locking castors, rubber bumpers, and a brushed stainless steel handle for easy maneuvering.

Fare Trolley System

A configurable F&B distribution and display system, the new Fare Trolley System offers operational efficiency across a property from morning to night.

Designed to a gastronorm footprint, this modular approach allows trolleys to be used in isolation or built out to larger stations using the drop in bridge.

The contemporary metal frame is complemented by a selection of materials (hardwoods and HPL available) which are reversible and replaceable, extending the longevity of the product.

Additional accessories extend the functionality with speed rails to maximise surface area and panels to conceal lower and middle shelves available, allowing the system to spend as much time as possible front of house.

Flow Trolley

The Flow trolley is the signature product of the Flow Range. It has been specifically designed to offer complete display flexibility. With multiple extending shelves that angle slightly forward to enhance the merchandising effect and a folding solid wood flap, each trolley offers an adaptable solution for both single and double-sided buffet serving.

As a beautiful display piece, it can be set up in the back of house and then easily rolled out for presentation at just the right time. Also available in oak, as a single sized unit, and with heating and cooling functionality.
